

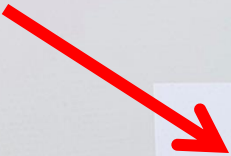

Mapping Setting up a Grid Pattern Icon Identification

- Remote controller connected.

Click on – Create a Route

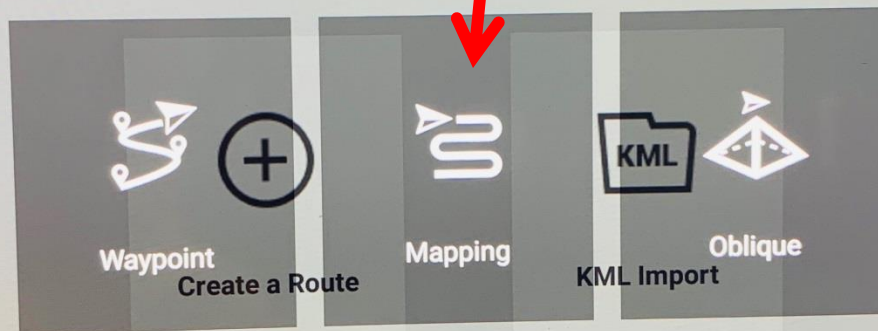

Create a Route

KML Import

Set waypoints or import KML files to create flight route.

Click on – Mapping

The image shows a horizontal menu with four items, each with an icon and text below it. From left to right: 1. An icon of a path with an arrow and a plus sign in a circle, with the text "Waypoint" and "Create a Route" below it. 2. An icon of a path with an arrow, with the text "Mapping" below it. A red arrow points to this item. 3. An icon of a folder labeled "KML" and a map with a path, with the text "KML Import" below it. 4. An icon of a map with a path, with the text "Oblique" below it.

Set waypoints or import KML files to create flight route.

Stop / Save
